SUMMARY

I'm a Full Stack Web Developer with 13 years of professional experience. I have a background in ecommerce, shipping calculations and order fulfillment as a backend developer in building CMS, CRM, Payment, Shipping Calculators and custom backend APIs. The technologies I am certified in are Laravel & PHP, Node.js, Express, MySQL, Mongo DB, jQuery, HTML5, CSS3 and have a proficient knowledge in Windows Desktop C# application development. I am always learning and playing with new technologies. I'm a creative thinker, problem solver and inventor of solutions that work. I work well with teams as a leader or player and can work alone or remote. As long as I'm creating and coding I'm happy

TECHNICAL SKILLS

Technologies: Laravel & PHP, Node.js & Express, Java Script, HTML5, CSS3, jQuery, MySQL, MongoDB, React.js, Viart, WordPress, Desktop QuickBooks, PayPal, Authorize.NET, Git, Trello, GitHub, NetBeans, VS Code, Visual Studio

EXPERIENCE

Lead Web Developer   *2016– Present*
Three Star Inc   Orlando, FL
Responsible for managing a small 2 person team with a key role as backend developer. I build new features and new applications for several of the companies' ecommerce websites and internal system. I work directly with the owner and stakeholders providing progress and documentation of these systems:
Key Technologies Used
- Laravel & PHP, Node & Express, Viart, HTML5, CSS3, JQuery, THREE.js

Accomplishments:
- Interactive 3D product viewer.
- Largest area first box packing algorithm shipping calculator.
- eBay quick listing web application using Laravel and the eBay PHP SDK
- SMS package location / progress notification system.
- Added countless features, enhancement and updates to CMS, CRM and Fulfillment Systems.

Software Developer   *2013 – 2016*
True Serenity   Orlando, FL
Software developer for business management, ecommerce and event management web applications and services. Worked with the owner to develop these custom solutions for point of

sale, customer management, event management, ticket sales and property rental systems. **Key Technologies Used:**

- PHP & Laravel
- C# (Desktop Windows Applications .NET)
- HTML5, CSS3 & Frontend JavaScript
- WordPress Framework

Accomplishments:

- Built custom plugins for WordPress
- Built custom plugins for WordPress
- Built custom POS system with C# and windows .NET
- Integrated all the system to communicate using a common database and CRUD API with Node and Express.
